

Cornelio Uderzo

Pediatric haemato-oncologist and stem cell transplant specialist,

S.Gerardo Hospital Monza,

University of Milan-Bicocca – Italy

Dr. Uderzo has over 25 years of experience in the diagnosis and treatment of hematological diseases of the pediatric age, he directed the hematopoietic stem cell transplant center at the S.

Gerardo of Monza from 1985 to 2012 and personally followed more than 600 transplant patients.

He has an active role in the European Group for Blood and Marrow Transplants (EBMT) since 1984 dealing with several prospective clinical trials in patients undergoing Bone Marrow Transplant for Leukemia, Severe Aplastic Anemia and Hemoglobinopathies. He was an active member of the EBMT Late Effects Working party since 1990 to 2015.

He has published over 250 articles relating to transplantation in national/international scientific journals hematopoietic marrow particularly in leukemia, hemoglobinopathies and aplastic anemia.

He's busy since 2012 in the training of local healthcare personnel in LIDCs (developing countries) in order to improve their skills and make them autonomous in clinical activity.

Co-founder of ODV HELP3 Charity (Monza- Italy) since 2014, he created a humanitarian project in Tanzania and Uganda for the diagnosis and treatment of 1000 pediatric patients suffering from "sickle cell disease".

Recently (2023) he directed the "start-up" of a Pediatric Hematology and Transplant Center at the "Benjamin Mkapa" Government Hospital in Dodoma (TANZANIA) where with the collaboration of Italian doctors and nurses the first stem cell transplants in patients with "sickle cell disease" have been successfully performed (see HELP3 website : www.help3.it).
